Two Week Coding Bootcamp to Launch in Tulsa, OK

TULSA, OK: As the tech industry takes off in Tulsa, OK, there is a rising tide of demand for more tech talent in the city. [Tech Talent South](#) hopes to fuel interest in tech by training students in the fundamentals of web development through its immersive two-week crash course. Tech Talent South (TTS) is ranked as one of the top coding boot camps in the nation by [Course Report](#) and in the world by [Switchup](#). The dates for their Pop up Code Program are, February 22- March 4, 2016, [applications are now open](#).

This two-week crash course is a consolidated version of Tech Talent South's eight-week Code Immersion Program. The \$2,250 course will cover the basics in web application development and will offer students the opportunity to test out learning to code and immerse themselves in

the local tech scene. Classes will be held in the evening Monday - Friday with one all-day Saturday session at [The Bridge](#).

Highlights of the Pop-Up Code Include learning:

- Ruby on Rails
- HTML and CSS
- Twitter Bootstrap
- Domain modeling for database-backed web applications
- Understanding and utilizing APIs

The idea for Tech Talent South's Pop Up Code initiative originated from seeing the tech industry infiltrating cities across the US, both big and small. TTS cofounder, Betsy Idilbi, wanted a way to quickly add value to these communities while also considering time and cost of more traditional programs in cities like New York and Los Angeles. Seeing the wildly successful idea of 'pop up shops', Idilbi thought why not pop up code schools, too?

The Tulsa Pop Up Code session will be running in partnership with [The Bridge](#), an innovative coworking space in the Tulsa area.

"We are thrilled to be offering Pop Up Code in Tulsa in partnership with [The Bridge](#)," said Betsy Idilbi. "We've seen an impressive positive shift in the Tulsa tech industry, especially in regards to the entrepreneurial, start-up scene and we're looking forward to being a part of it!"

For students interested in simply testing the waters of learning to code, the TTS Pop Up Code session is a perfect trial run. If a student wants to continue their education, TTS will offer a full refund with acceptance into the TTS full-time code immersion program, a half refund with acceptance into the TTS part-time code immersion program or a \$600 refund with attendance to a TTS verified coding bootcamp.

To enroll in the Tech Talent South Tulsa, OK Pop Up Code program visit the TTS website, techtalentsouth.com/pop-up-code.html. Also, check out the [student](#) and [alumni](#) blogs for more information on TTS and the amazing students that have ventured through its programs.
